Python
Javascript
APIs, JSON
HTML, CSS
React, Typescript
Django
PostgreSQL, MySQL
AWS
C++
Linux, macOS
unittest, Jest
PHP, Go, Docker, Jenkins

Interests

Experience

Full-stack developer

Toptal

Sep 2022 - Ongoing Remote

Working as an independent freelancer in different full-stack projects for different clients, generally using React, Python, Django and PostgreSQL, publishing projects in Heroku and Render. Docker for CI/CD.

Software Engineer Intern

Facebook Inc

26 Jul 2021 - 15 Oct 2021 London

Working full-stack using Hack/PHP, React and GraphQL. Moved system for Identity Verification for running Political Ads in Brazil from deprecated system to new one in Comet. Launched without issues, getting 2000 exposures per day.

IB Math Teacher

Northlands School

May 2020 - July 2022 Argentina

Teaching Maths (IB Diploma Program) to highschool students of ages 16, 17, 18.
I also teach Maths and Physics as a private tutor sporadically since 2014.

Software Engineer

Brightsector for MercadoLibre

Oct 2016 - Sep 2022 Argentina

Code maintenance and creation of frontends (Django). Use of Python, Icinga web and Linux server to create tests for mercadolibre's API to check new code deployed
CI/CD methodology with Jenkins and Bitbucket pipelines.

Software Engineer Intern

Facebook Inc

6 Jan 2020 - 27 Mar 2020 London

Working full-stack using Hack/PHP and React. Improved the experience of selling products through any Facebook product (Instagram, Marketplace, etc.).
